Calls for proposals

Calls for proposals are funding opportunities issued by the European Union institutions, agencies and bodies. These are direct financial contributions, known as grants, that are awarded to third-party beneficiaries (e.g., research organisations, public entities and private companies) to engage in activities that serve EU policy objectives.

Topic description

Expected Outcome:
The proposals are expected to contribute to all the following outcomes:

- Extended functionalities of electronic Freight Transport Information (eFTI) of the implementation of Regulation 2020/1056^[1] for:
 - new use cases, solutions and applications, enabling harmonised sharing and exchange in multimodal logistics chains and hubs supporting reporting, sustainability claims and other actions leveraging efficiency;
 - complementary applications and services for electronic business-to-business (B2B) implementation by businesses of relevant Union regulatory framework such as in the context of smart enforcement, statistics, customs, and external costs calculators;

How to shape an elite consortium

- Partner search in F+T portal
- Leverage your international connections
 - Remind them Canada is now eligible for Pillar 2, all clusters and Missions
 - Don't overlook associated countries
 - Türkiye, Tunesia, Egypt, New Zealand, S-Korea, ...
- Attend matchmaking sessions
 - online Brokerage Event: January 26–30, 2026
- NCP network: partner search forms
- Scope out CORDIS

A screenshot of the CORDIS - EU research results page for the MULTIR project. The page is titled "CORDIS - EU research results" and features a navigation bar with links to Home, Thematic Packs, Projects & Results, Videos & Podcasts, News, Databank, and Search. The project title is "MULTIR - Tumour based prediction and manipulation of Immune Response". The project description states: "Few cancer patients respond optimally to treatment, as therapies often rely on poorly understood interactions between tumours and the host immune system. These gaps in knowledge hinder targeted interventions and limit outcomes. To bridge this divide, better insights into the dynamic interplay between tumours and their hosts are essential. With this in mind, the EU-funded MULTIR project will integrate vast molecular data from melanoma, lung, and bladder cancers to identify critical factors influencing therapy response. Bringing together experts from 10 EU countries, the project leverages cutting-edge AI tools and multi-layer datasets to decode tumour-host evolution. MULTIR aims to boost drug discovery, develop predictive tools, and accelerate the adoption of innovations into healthcare systems." The project information section includes the grant agreement ID: 101136926, the DOI: 10.3099/101136926, the EC signature date: 7 December 2023, the start date: 1 January 2024, and the end date: 31 December 2027. The total cost is € 8 547 711.50, and the EU contribution is € 8 547 711.50. The project is funded under Health. The fields of science (EuroSciVoc) include medical and health sciences, clinical medicine, oncology, skin cancer, melanoma, medical and health sciences, basic medicine, and immunology. The keywords section is also visible.

Strengthen your proposal

- Know the EC expectations, and match yours
 - Don't bend the call text to fit your solution, bend your solution to the call text.
- Follow the call text closely, specifically scope, outcomes, impacts
 - 'one of', 'some of', 'most of', 'all of'.
- Write clearly and concisely
- Again, don't stumble at the last hurdle: submit 48h before the deadline
